PKG Includes:

- (16) A Temp.
- (8) B Temp.
- (8) C Temp.
- (16) D Temp.
- (8) H Temp.
- (8) I Temp.

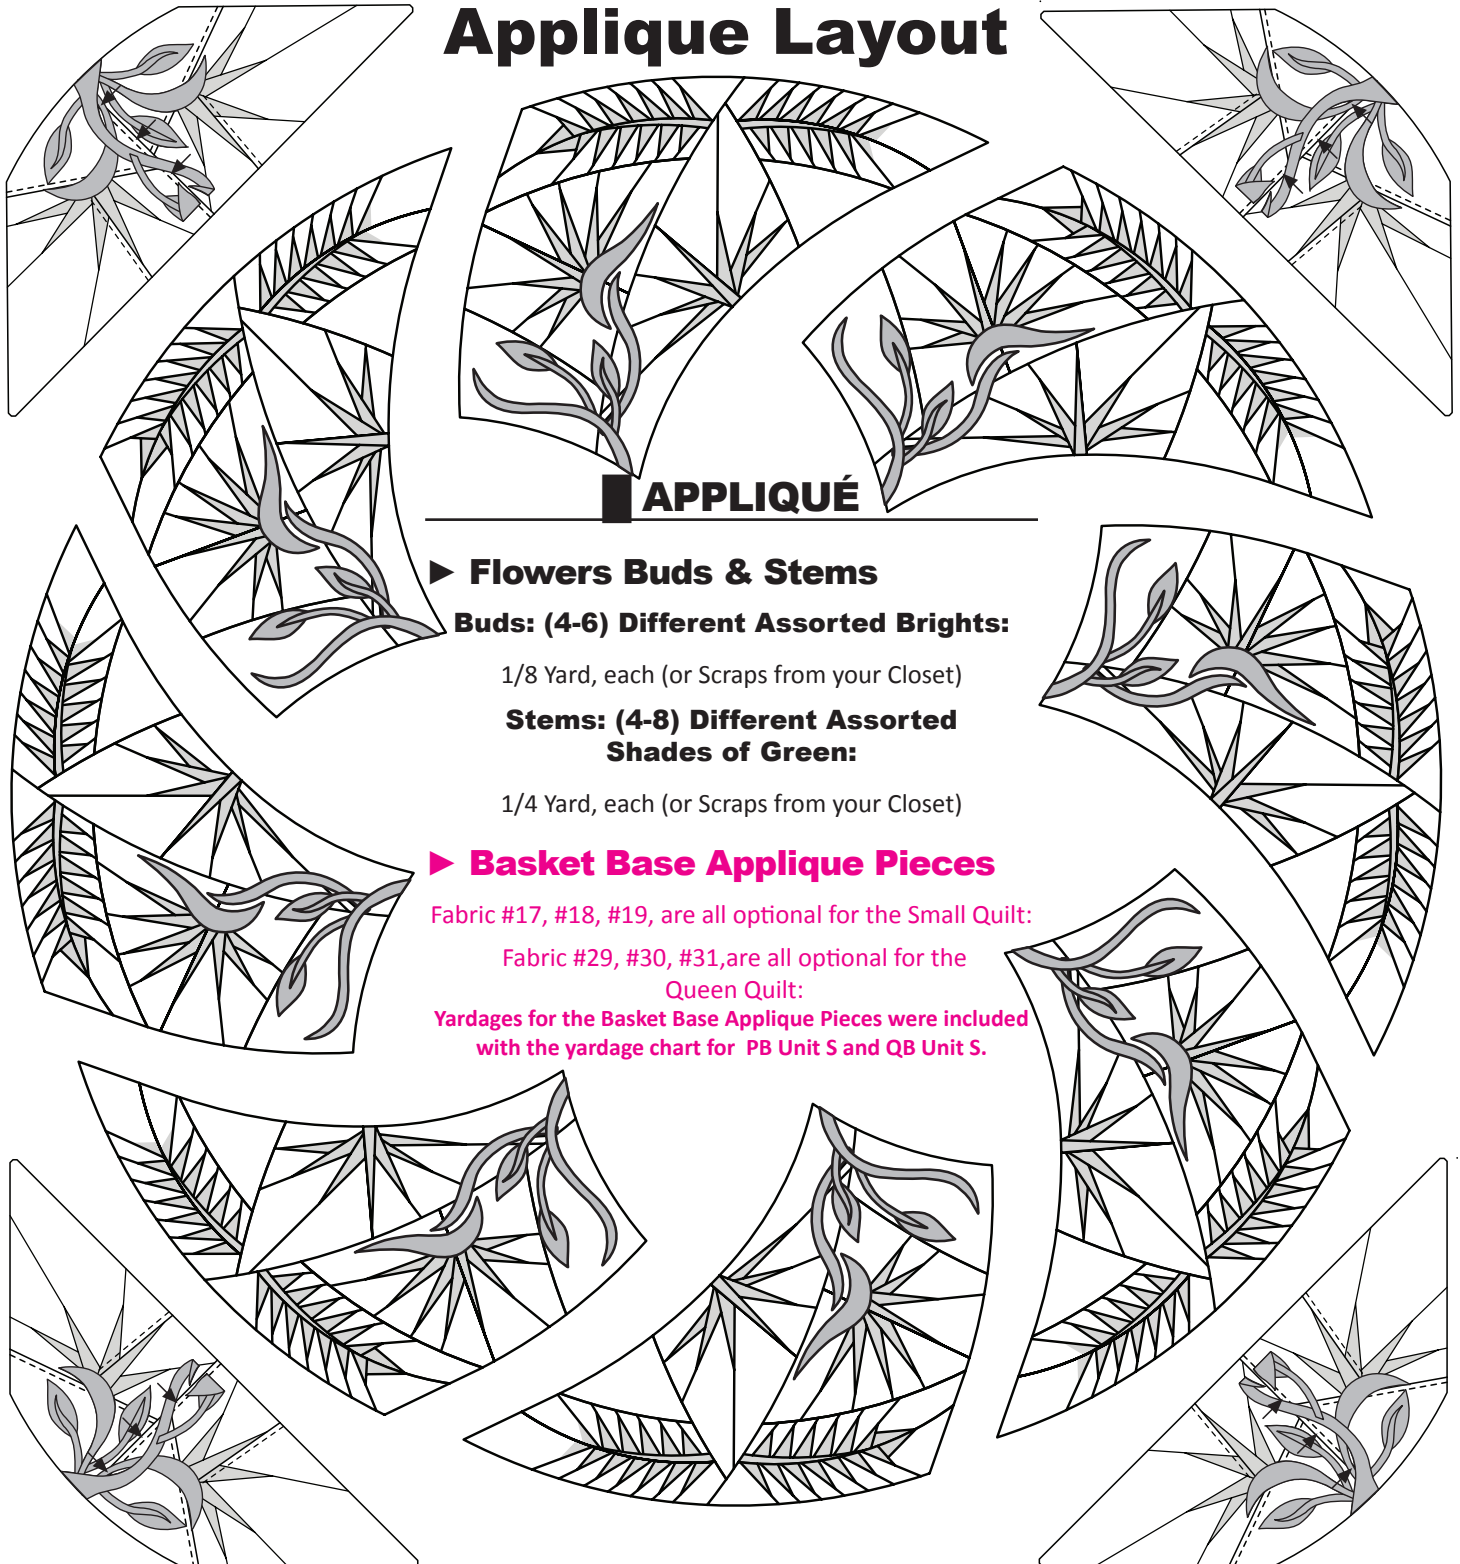

Product Notation: Stitch n Peel is a light weight cellulose-based stabilizer used for machine appliqué. The stabilizer remains in the quilt after the appliqué is completed. Over time the stabilizer will break down and soften as you use the quilt. If and when the quilt is washed, the stabilizer will soften and dissolve into little fibers that will become part of your quilt. The template pieces are cut with a paper backing that is peeled off just before placing it onto your fabric. After the paper backing is removed the pieces are placed on the backside of your fabric, sticky side down. If you make a mistake when placing the pieces onto your fabrics, simply peel it off, then reposition it onto the fabric again.

Notes: Fusible Appliqué Kits are available as an option with a few of the fabric kits. If you purchased a kit that included the fusible appliqué pieces, skip the instructions on turn under appliqué. The Center Medallion and Baskets should be finished before you apply the fusible appliqué to your fabrics. The stitch width and length of your appliqué stitch should be adjusted to the size of your thread.

Booklet Four: Applique Layout
