Special Note for Bali Pops™

Bali Pops[™] can also be used to make this quilt. If using the Bali Pops to[™]make this quilt, simply choose the (5) or (6) packages you wanted to work with, throw all the strips into a big container, then start pulling fabric strips out and build (11) different color groups. Your color groups will not be the same as the ones shown with this handout, but that doesn't matter. Whatever you choose will look great!

Note: The remaining Bali Pops[™] strips can be used to make another one of our NEW publications called Stepping Stones.
